

# Discussion issues - cloud microphysics

1. Instrument issues – HALO-G1 intercomparisons
2. Cloud probe meeting?
3. Resolving PCASP and UHSAS sizes with CCN(S).
4. Ice imagery and high level products
5. What do we need to process for addressing warm and cold cloud invigoration hypotheses?
6. Missing super-clean measurements - can we get them in Barbados?
7. Invigoration by cloud lifecycle stages?
